1. The reconstruction and reclaiming of the copper mines and foundries at Boleslawiec (Bunzlau) (052/B42), in Polish administered German Lower Silesia, began during July 1947. The pure copper content of the ore at this place is reported to be between 0.9 and 1.2 percent.

2. A new combine of three plants, to be known as the "Wisow Combine", is being formed to produce copper and allied metals, sulphuric acid and cement. This combine, which is not yet included inside the framework of the Polish State Plan, will start production about 1950.

3. Units are to be put into commission in the following order: a) the "Lena" mine, which produces concentrates for storage; b) the sulphuric acid factory; c) the foundry, and d) the mines "Konrad I" and "Konrad II".

This document contains information affecting the national defense of the United States within the meaning of the EspionageAct, 50, U.S.C. 31 and 32 as amended. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.
